

Funcții injective, surjective, bijective

Def = $f: A \rightarrow B$ o funcție. Spunem că f este:

- injectivă : $\forall x_1, x_2 \in A \text{ o.t. } f(x_1) = f(x_2) \Rightarrow x_1 = x_2$
- surjectivă : $\forall b \in B, \exists a \in A \text{ o.t. } f(a) = b$
- bijectivă = f injectivă + surjectivă

Examen

Th de caracterizare a funcțiilor injective:

$$f: A \rightarrow B \text{ UASE.}$$

(1) f este injectivă

(2) (simplificare la st) $\forall A' \xrightarrow[\beta]{\alpha} A$, avem că $f \circ \alpha = f \circ \beta \Rightarrow \alpha = \beta$

(3) (imburse la stânga/retracție) $\exists \pi: B \rightarrow A$ o.t. $\pi \circ f = 1_A$

$\begin{array}{c} \swarrow \\ \pi(f(1)) \\ \downarrow \\ f: A \end{array}$

Th de caracterizare a funcțiilor surjective

$$f: A \rightarrow B \text{ UASE}$$

(1) f este surjectivă

(2) (simplificare la dr) $\forall B' \xrightarrow[\beta]{\alpha} B$, dare $\alpha \circ f = \beta \circ f \Rightarrow \alpha = \beta$

(3) (imburse la dreapta/retracție) $\exists \pi: B \rightarrow A$ o.t. $f \circ \pi = 1_B$

Examen ! ex de la examen

Să se det toate xst funcții surj $f: A \rightarrow B$ unde
 $A = \{1, 2, 3, 4, 5\}$ și $B = \{a, b, c\}$ iar f

x	1	2	3	4	5
f(x)	c	c	a	b	a

$\text{Im} f = \{a, b, c\} = B \Rightarrow f$ surjectivă $\xrightarrow{\text{Th de carte}}$ o funcț. surj

$\exists \alpha: B \rightarrow A$ o i. $f \circ \alpha = \text{id}_B \rightarrow$

$$\begin{cases} (f \circ \alpha)(a) = \text{id}_B(a) \Rightarrow f(\alpha(a)) = a \Rightarrow \alpha(a) \in \{3, 5\} \\ (f \circ \alpha)(b) = \text{id}_B(b) \Rightarrow f(\alpha(b)) = b \Rightarrow \alpha(b) \in \{4\} \\ (f \circ \alpha)(c) = \text{id}_B(c) \Rightarrow f(\alpha(c)) = c \Rightarrow \alpha(c) \in \{1, 2\} \end{cases}$$

$\Rightarrow$ total $2 \cdot 1 \cdot 2 = 4$ funcții

x	a	b	c
$\alpha_1(x)$	3	4	1
$\alpha_2(x)$	3	4	2
$\alpha_3(x)$	5	4	1
$\alpha_4(x)$	5	4	2

(50) Fie $f: A \rightarrow B$ și $g: B \rightarrow C$ 2 funcții. Să se:
 a) decidă dacă f și g sunt injective, resp. surj atunci
 $g \circ f$ este inj, resp surj

Pp f și g injective. Demonst $g \circ f: A \rightarrow C$ injectivă

Fie $a_1, a_2 \in A$, $(g \circ f)(a_1) = (g \circ f)(a_2) \Rightarrow a_1 = a_2?$

$$(g \circ f)(a_1) = (g \circ f)(a_2) \Leftrightarrow g(f(a_1)) = g(f(a_2)) \xrightarrow{g \text{ inj}} f(a_1) = f(a_2) \xrightarrow{f \text{ inj}} a_1 = a_2$$

$$(H_{II}) (g \circ f) \circ \alpha = (g \circ f) \circ \beta \Rightarrow \alpha \stackrel{?}{=} \beta$$

Soit A' arbitraire si α et β 2 fonctions
 $\alpha, \beta: A' \rightarrow A$

$$(g \circ f) \circ \alpha = (g \circ f) \circ \beta \xrightarrow[\text{10}]{\text{cancel}} g \circ (f \circ \alpha) = g \circ (f \circ \beta) \left\{ \begin{array}{l} \text{Th cancel} \\ g \text{ inj} \end{array} \right\} \Leftrightarrow$$

$$\Leftrightarrow f \circ \alpha = f \circ \beta \xrightarrow[\text{Th cancel}]{f \text{ inj}} \alpha = \beta$$

$\Rightarrow g \circ f$ simplifiable à gauche $\xrightarrow[\text{inj}]{\text{Th}} g \circ f \text{ inj}$

$$(H_{III}) \text{ Pp } f, g \text{ inj. Démontrer } g \circ f: A \rightarrow C \text{ inj}$$

$$f \text{ inj} \xrightarrow[\text{inj}]{\text{Th cancel}} \exists f': B \rightarrow A \text{ et } f' \circ f = 1_A$$

$$g \text{ inj} \xrightarrow[\text{inj}]{\text{Th}} \exists g': C \rightarrow B \text{ et } g' \circ g = 1_B$$

↓

$$f' \circ g' = C \rightarrow A$$

$$\text{Calculer: } (f' \circ g') \circ (g \circ f) (= 1) \Leftrightarrow$$

~~$$f' \circ g' \circ (g \circ f) = f' \circ (g' \circ g) \circ f = f' \circ 1_B \circ f = f' \circ f = 1_A$$~~

~~$$f' \circ (g' \circ g) \circ f = f' \circ 1_B \circ f = f' \circ f = 1_A$$~~

$$= 1_A \Rightarrow \boxed{\begin{array}{l} f' \circ g' \text{ inverse à } g \circ f \\ \text{et } g \circ f \Rightarrow g \circ f \text{ inj} \end{array}}$$

a) $f: A \rightarrow B, g: B \rightarrow C$

Pp f, g surj. Dem $g \circ f: A \rightarrow C$ surj =

Fie C' o multime oarecare, $\alpha, \beta: C \rightarrow C'$ o.i.

$$\alpha \circ (g \circ f) = \beta \circ (g \circ f) \stackrel{?}{\Rightarrow} \alpha = \beta$$

$$\alpha \circ (g \circ f) = \beta \circ (g \circ f) \stackrel{\text{surj}}{\Rightarrow} (\alpha \circ g) \circ f = (\beta \circ g) \circ f \xrightarrow{\text{Th corel}} \alpha \circ g = \beta \circ g$$

$$\Leftrightarrow \alpha \circ g = \beta \circ g \xrightarrow[\text{Th corel}]{g \text{ surj}} \alpha = \beta$$

b) Dacă $g \circ f$ este inj, resp surj atunci f inj (resp g surj)

Pp $g \circ f$ inj. Dem f inj

Alegem A' multime si $\alpha, \beta: A' \rightarrow A$ o.i. $f \circ \alpha = f \circ \beta \Rightarrow$
 $\stackrel{?}{\Rightarrow} \alpha = \beta$

$$\text{Stim ca } f \circ \alpha = f \circ \beta \Rightarrow g \circ (f \circ \alpha) = g \circ (f \circ \beta) \stackrel{\text{surj}}{\Rightarrow}$$

$$\Rightarrow (g \circ f) \circ \alpha = (g \circ f) \circ \beta \xrightarrow[\text{Th corel}]{g \circ f \text{ inj}} \alpha = \beta$$

deci f simplificabil la $\alpha \Rightarrow f$ inj

Pp $g \circ f$ surj. Dem g surj

~~Alegem~~ Fie C' o multime oarecare, $\alpha, \beta: C \rightarrow C'$ o.i.

~~$$\alpha \circ (g \circ f) = \beta \circ (g \circ f) \stackrel{?}{\Rightarrow} \alpha = \beta$$~~

$$\alpha \circ g = \beta \circ g \stackrel{?}{\Rightarrow} \alpha = \beta$$

$$\alpha \circ g \circ f = \beta \circ g \circ f \xrightarrow[\text{Th surj}]{g \text{ simplificabil}} \alpha \circ (g \circ f) = \beta \circ (g \circ f) \xrightarrow{\text{Th corel}} \alpha = \beta$$
